

Vibromate-1

Automatic vibration analyzer

No requires expertise to operate or analyze

Features :

Frequency response 0 - 25 KHz 0-3 db

Accept any ICP sensor

Strobe light for speed measurement and phase reference

Accept voltage and orbit plot (option)

Field balance(option)

Spectrum analyzer, Envelop, Crest factor, Kurtosis

Internal data base management and external data transfer to host .

Automatic self-analysis for machine health condition

ISO-10816 criteria

Unbalance, Misalignment, Structure & looseness, Bearings condition,

Gear analysis, Electric motor problem
